Plan de Salud Menonita 2024*

INTRODUCCIÓN / INTRODUCTION

Tú cubierta de farmacia utiliza una lista de medicamentos o formulario que te ofrece una selección amplia de opciones de tratamiento.

Your pharmacy coverage uses a Drug List or Formulary that offers you a wide selection of treatment options.

Los medicamentos en esta lista o formulario han sido seleccionados por su seguridad, efectividad en el tratamiento de condiciones de salud y su costo. Dicha lista consiste de medicamentos con leyenda aprobados por la Administración de Drogas y Alimentos (FDA, por sus siglas en inglés) que están disponibles en el mercado y algunos medicamentos sin leyenda federal (OTC, por sus siglas en inglés), para las clasificaciones que se incluyen.

The medications in this list or formulary have been selected based on their safety, cost, and effectiveness to treat health conditions. This list features prescription drugs that have been approved by the Food and Drug Administration (FDA) and are available in the market, as well as certain over-the-counter drugs (OTC) under the included categories.

En las páginas a continuación presentamos toda la información requerida para facilitarte la lectura e interpretación.

The following pages include all the information you will need to help you read and interpret the List.

Te exhortamos a que evalúes con tu médico los medicamentos disponibles para tratar tu condición. Nuestra lista tiene una diversidad de medicamentos por condición, los cuales incluyen genéricos y de marca preferidos. Si utilizas estos medicamentos contribuyes a mantener los costos del beneficio de farmacia en un nivel razonable y tus copagos serán menores.

We urge you to talk with your doctor and evaluate the medications available to treat your condition. Our List contains a variety of medications classified by condition, including generic and preferred brand drugs. If you use these drugs, you will be helping keep the pharmacy benefit costs at a reasonable level, and your co-payments will also be lower.

Este documento presenta la forma en que se diseñó la lista de medicamentos, así como una descripción de los éditos para verificar dosis y terapias duplicadas. Se muestran los medicamentos por clasificación terapéutica, los apéndices y una lista por orden alfabético (Índice) de los medicamentos disponibles en esta lista.

This document shows how the Drug List was designed, as well as a description of the edits to review dosages and duplicate therapies. The drugs are listed by therapeutic categories. This document also includes appendixes and an alphabetical list (index) of the drugs available in the List.

La inclusión de un medicamento a la Lista no indica que el mismo está cubierto. El certificado del beneficio de Farmacia es el que determina si el medicamento está cubierto o excluido en la póliza. Por ejemplo, los agentes para la disfunción eréctil, las hormonas de crecimiento y los medicamentos sin leyenda federal (OTC) usualmente están excluidos de la cubierta de farmacia.

The inclusion of a drug in the List does not mean the drug is covered. The Pharmacy Benefit Certificate determines whether the drug will be covered or excluded by the plan. For example, drugs to treat erectile dysfunction, growth hormones, and over-the-counter drugs (OTC) are not normally covered by the drug plans.

PARTE I - DISEÑO DE LA LISTA DE MEDICAMENTOS / PART I- DRUG LIST DESIGN

¿Cómo usar esta lista de medicamentos? / How do I use the drug list?

La forma más fácil para conseguir los medicamentos es buscando en el índice. El índice provee una lista por orden alfabético de todos los medicamentos que se presentan en este documento, tanto los de marca como los genéricos. Al lado del medicamento está el número de la página donde encontrarás cómo está cubierto. Busca la página indicada en el índice y encuentra el nombre del medicamento en las columnas.

The easiest way to find the drugs is through the Index. The Index gives you an alphabetical list of all the drugs in this document, both brand name and generic drugs. Next to the drug, you will see the page number where you can find the coverage information. Turn to the page listed in the Index to find the name of the drug listed in the columns.

¿Cuánto pagas por los medicamentos cubiertos? / How much will you pay for covered drugs?

Los medicamentos se clasifican por niveles. Los niveles a continuación identifican los distintos niveles de costo compartido, o sea, lo que pagas por cada medicamento en la receta.

- Nivel 1 –medicamentos genéricos
- Nivel 2 – medicamentos de marca preferidos
- Nivel 3 – medicamentos de marca no preferidos
- Nivel 4 – productos especializados

The Drug List is arranged by levels. These levels, listed below, point out the cost-sharing levels, which is what you pay for each prescribed drug.

- *Level 1 –generic drugs*
- *Level 2 – preferred brand drugs*
- *Level 3 – non-preferred brand drugs*
- *Level 4 –specialty products*

¿Qué son medicamentos genéricos (Nivel 1)? / What are generic drugs (Level 1)?

Un medicamento genérico tiene el mismo ingrediente activo en la fórmula que el de marca. Usualmente cuestan menos que los de marca y están aprobados por la Administración Federal de Drogas y Alimentos (FDA, por sus siglas en inglés).

A generic drug has the same ingredient in identical amount as the brand name drug. They cost less than brand name drugs and are approved by the Food and Drug Administration (FDA).

Este nivel incluye genéricos que han sido seleccionados por el Comité de Farmacia y Terapéutica como agentes preferidos luego de su evaluación de seguridad, eficacia y costo.

This level includes generic drugs selected by the Pharmacy and Therapeutics Committee as preferred agents, after evaluating their safety, efficiency, and cost.

Éstos están escritos en letras minúsculas (ejemplo, nabumetone).

Generic drugs are listed in lowercase (e.g., nabumetone) in the Drug List.

PA = Prior Authorization [Pre Autorización]; QL = Quantity Limit [Límite de Cantidad]; ST = Step Therapy [Terapia Escalonada]; AL = Age Limit [Límite de Edad]

¿Qué son medicamentos de marca preferidos (Nivel 2)? / What are preferred brand drugs (Level 2)?

Este nivel incluye medicamentos de marca que han sido seleccionados por el Comité de Farmacia y Terapéutica como agentes preferidos luego de su evaluación de seguridad, eficacia y costo. Los mismos están identificados a la derecha como nivel 2. En aquellas clases terapéuticas donde no hay genéricos, te exhortamos a que uses como primera alternativa aquellos identificados como preferidos.

This tier has brand name drugs that have been classified by the Pharmacy and Therapeutics Committee as preferred agents, after an in-depth review in terms of safety, efficiency, and cost. These are identified as level 3 next to the name of the drug. For therapeutic classes where there are no generic drugs, we suggest you use the preferred drugs as your first choice.

¿Qué son medicamentos de marca no preferidos (Nivel 3)? / What are non-preferred brand drugs (Level 3)?

Un medicamento es clasificado como marca no preferido porque existen alternativas en los niveles anteriores con menos efectos secundarios o son más costo-efectivos. Si el asegurado obtiene un medicamento de marca del nivel 4, tiene que pagar un costo mayor.

A brand name drug is classified as non-preferred when there are other choices in other drug levels that have fewer side effects and/or are more cost effective. If you obtain a level 4 drug, you will have to pay more for that drug.

¿Qué son productos especializados (Nivel 4)? / What are specialty products (Level 4)?

Los medicamentos especializados requieren una administración o manejo especial, por su composición compleja. Estos se usan para tratar condiciones crónicas y de alto riesgo que requieren un manejo especial de la condición.

Specialty Drugs need special administration and/or management due to their complex composition. These are used to treat high-risk and chronic health conditions that need special management.

Guías de Referencia / Reference Guidelines

Medicamentos que requieren preautorización (PA) / Medications that require preauthorization (PA)

En un esfuerzo por garantizar la seguridad y el uso apropiado de los medicamentos, algunos necesitan una preautorización para ser adquiridos. Los mismos se han identificado a la derecha con **PA (requiere preautorización)**, en cuyo caso, la farmacia gestiona la preautorización previo al despacho del medicamento.

To guarantee the safe and effective use of drugs, there are certain drugs that need a preauthorization (PA) before dispensing it. A PA is placed next to the name of the drug to identify them, and the pharmacy will process the preauthorization before dispensing it.

Los medicamentos que requieren preautorización usualmente son candidatos al uso inapropiado o están relacionados con un costo elevado por lo que requieren que el asegurado cumpla con unos criterios antes de ser despachados. Aquellos medicamentos que han sido identificados que requieren preautorización deben satisfacer los criterios clínicos establecidos según lo haya determinado el Comité de Farmacia y Terapéutica. Estos criterios clínicos se han desarrollado de acuerdo a la literatura médica actual.

The drugs that need preauthorization are those for which you need to meet certain criteria before using them, are likely to be used inadequately, or have a higher cost. Drugs identified as needing preauthorization should fulfill the clinical criteria, as determined by the Pharmacy and Therapeutics Committee. The criteria have been developed as stated by current medical literature.

También, tienen requisito de PA aquellos medicamentos cuyos costos excedan \$750.00 (verifica tu certificado de beneficio ya que esta cantidad puede ser diferente). La farmacia enviará copia de la receta y se encargarán del proceso.

Drugs whose cost goes beyond \$750.00 will require a preauthorization (check your health plan benefits, as this amount could be different). The pharmacy will send a copy of the prescription to the health plan and will take care of the process.

Programa de Terapia Escalonada (ST) / Step Therapy Program (ST)

En algunos casos, requerimos que utilices primero un medicamento como terapia para tu condición antes de que cubramos otro para esa condición (Terapia Escalonada, ST por sus siglas en inglés). Por ejemplo, si el Medicamento A y el Medicamento B se usan ambos para tratar tu condición médica, nosotros requerimos que utilices primero el Medicamento A. Si el Medicamento A no te funciona, entonces cubrimos el Medicamento B.

In some cases, you need to try one drug first to treat your health condition before we cover other drugs for the same condition (Step Therapy). For example, if Drug A and Drug B both treat your health condition, you may need to use Drug A first. If Drug A does not work for you, then we will cover Drug B.

Límites de cantidad (QL) / Limits on the amount to be dispensed (QL)

Ciertos medicamentos tienen un límite en la cantidad a despacharse. Estas cantidades se establecen de acuerdo a lo sugerido por el fabricante como la cantidad máxima adecuada que no está asociada a efectos adversos y la cual es efectiva para el tratamiento de una condición. En el área de Requisitos de la lista de medicamentos se identificaron los límites en la cantidad a despacharse, en aquellos que aplique.

PA = Prior Authorization [Pre Autorización]; QL = Quantity Limit [Límite de Cantidad]; ST = Step Therapy [Terapia Escalonada]; AL = Age Limit [Límite de Edad]

Certain drugs have a limit on the amount to be dispensed. These amounts are established according to the manufacturer's recommendation for adequate amounts to avoid adverse effects and effectively treat a health condition. The Requirements column in the Drug List points out the quantity limits for applicable drugs.

Límites de especialidad médica (SL) / Medical specialty limits (SL)

Algunos medicamentos tienen un límite en la especialidad médica. Estos límites de especialidad se establecen de acuerdo a la literatura médica actual.

Some drugs have medical specialty limits. These limits are established in line with current medical literature.

Límites de edad (AL) / Age limits (AL)

Algunos medicamentos tienen un límite de edad.

Some drugs have an age limit.

PA = Prior Authorization [Pre Autorización]; QL = Quantity Limit [Límite de Cantidad]; ST = Step Therapy [Terapia Escalonada]; AL = Age Limit [Límite de Edad]
